

Qno:8 Flowchart

Pseudocode: 8

Start

Print "Enter a number"

Input "n"

Input mod, sum = 0

While (n > 0)

mod = ~~n~~ n % 10

sum = sum + mod

n = n / 10

End While

Print "sum"

End.

Ans: 8

Input

Processing

Output

* Enter a

Calculate the

number "

remainder of the

Display "mod"

" num "

by dividing it by

to save it in to "mod"

Divide the number by

10 and save it

into "num". keep

repeating these steps

until the remainder

is ~~not~~ num == 0 then

add all remainders in

"mod"
